DATA ACCOUNTABILITY POLICY

POL-DG-001·v1.0

OWNER: Data Governance Council · Effective: Nov 2026 · Review Quarterly

---

1. ACCOUNTABILITY & OWNERSHIP
   - 1.1. Executive Sponsor: Sets the strategic vision for data governance, resolves escalated cross-functional disputes and holds ultimate accountability for program outcomes.
   - 1.2. Data Governance Council: A cross-functional steering group that sets enterprise data governance policy and direction. It develops enterprise-wide policies, standards, and frameworks, arbitrates cross-domain data conflicts, and escalates critical issues to the executive sponsor.
   - 1.3. Data Owner: Accountable for the quality, integrity, and authorized use of data within their domain, with final authority on all decisions within their domain.
   - 1.4. Data Steward: The day-to-day operational facilitator who translates governance policy into daily practice, maintaining data dictionaries, monitoring data quality, and serving as the subject matter expert for their domain.
   - 1.5. Data Custodian: Manages the technical implementation of infrastructure, security, and controls behind data assets, in accordance with owner approvals and governance policy.
   - 1.6. Data Community: Adhere to governance policies in their day-to-day use and creation of data, reporting needs and issues to the appropriate data steward.
